

Accurate Measurements On The First Try

MSHS VDOScope Services™ is a match of highly trained MSHS engineers and the latest in inspection technology. We utilize Olympus® technology, iPlex LX/LT™ to provide customers with cost-effective diagnostics and inspections services. The compactness of the iPlex LX/LT™ makes it easy for our engineers to travel 24/7 to customers' sites. MSHS is able to offer customers high-resolution images and video recorded on a USB Flash Drive making it possible to have immediate visual results. We also provide accurate measurements of tolerances and dimensions.

The flexibility of MSHS VDOScope Services™ places the power back in the customers' hands allowing them to make decisions without committing to lengthy and, at times, expensive service. For more information or to arrange service, contact our Service Team at service@mshs.com or call 954-763-3660.

Inspections offer complete picture

Using the latest industrial videoscope technology, MSHS engineers provide accurate equipment inspections even in difficult locations and environments.

Innovative features of the iPLEX videoscope provide:

- Image data management and precise measurements
- Real-time tip-to-target distance measurement
- Instant review of inspection results
- Clear, Crisp Images
- Image enhancements
- Ultra-Bright illumination regardless of scope length
- Accurate detection of very small defects
- Dynamic images produced across the entire depth of field
